

FILTERSAFE SPOTLIGHT

Kibbutz Yehi'am Farm

INDUSTRY
Agriculture

APPLICATION
Drip Irrigation Protection

- FILTERSAFE**
- 20 years filtration experience
 - 3,500+ installations
 - 10µm upwads & 9,000 m³/hr.
 - Modular filter technology

Installation	Kibbutz Yehi'am Farm
Application	Prefiltration for irrigation
Installation date	2019
Location	Kibbutz Yehi'am, Israel
Filter Model	FS050H
Filtration Degree	100 microns
Treatment Capacity	90-120 m ³ /hr
Client	Kibbutz Yehi'am Farm

"Filtersafe dramatically reduced our problems.

Our previous filtration system couldn't cope with our source water. We work with treated wastewater that was stored in a reservoir and has a lot of red worms and their eggs in it, which creates a goo that mucked up the filtration system and prevented the filters from working properly. The filters would have to be stopped and manually cleaned at least 5-6 times a season.

*In the 2 years since the Filtersafe filter replaced the previous filtration system, we haven't had to open it to clean it even once. **The Filtersafe filter saves us a tremendous amount of man-hours.** Even downstream, where we have more filtration systems, of the previous kind, we previously had to stop and clean them 3 times a week. Now we only have to clean them once a month."*

Orr Cohen

Water Manager, Kibbutz Yehi'am Farm
